

Precision Blasting, LLC

DYNAMITE DAN · ROCK DRILLING, BLASTING & CONTROLLED ROCK DEMOLITION

Veteran-Owned Small Business · Salmon, Idaho · (208) 756-7215 · precisionblasting.biz

CAPABILITY STATEMENT

UEI QQE1N3FDX4L3 · CAGE 19RJ3

COMPANY OVERVIEW

Precision Blasting, LLC is a veteran-owned specialty contractor performing controlled rock drilling, blasting and rock removal for civil and infrastructure work. We break the ledge, boulder and rock shelf that stops conventional excavation — faster and at lower cost than hydraulic hammering. Owner-operated: the licensed blaster who designs the shot is the person who walks your site.

CORE COMPETENCIES

Controlled Hard Rock Blasting

Foundations, house pads, road construction and widening, driveways and utility installations in rocky terrain.

Trenching in Rocky Soils

Utility, drainage and pipeline corridors through hard or rocky ground.

Site Preparation & Rock Excavation

Grade cuts, benches and pad preparation where mechanical methods stall.

Stream & Pond Obstruction Clearing

Explosive and non-explosive removal of blockages to restore flow and drainage.

Dangerous Tree Blasting

Removal of hazardous trees where conventional methods are unsafe or unreachable.

Non-Explosive Rock Breaking

Expanding grout and mechanical methods for vibration-sensitive or restricted sites.

Blast Design & Safety

Pattern design, fragmentation control, presplitting, pre-blast survey and seismograph vibration monitoring.

PAST PERFORMANCE & EXPERIENCE

Road & Highway Rock Excavation

Blasting for road widening, new construction and grade cuts in rocky terrain across Idaho, Montana and the Pacific Northwest.

Remote Federal Land Projects

Mobilization and blasting support on USFS and BLM project sites in remote, logistically challenging environments.

Utility Trenching in Hard Soils

Utility and drainage installation through rock where conventional excavation is impractical or cost-prohibitive.

Foundation & Site Preparation

Controlled blasting for building foundations and site development in rocky ground.

CORE DIFFERENTIATORS

Precision Blast Planning

Charge weight per delay held inside the scaled distance limit for the nearest structure — protecting adjacent buildings, wells and utilities.

Explosive and Non-Explosive

Both methods in-house, so the right tool fits the regulatory environment, including sensitive or restricted areas.

Safety-First Operations

ATF licensed and compliant. Experienced with EM 385-1-1 standards required on USACE and federal project sites.

Remote Terrain Capability

Self-sufficient mobilization to remote forest, mountain and rural federal land sites where conventional contractors cannot operate.

Cost & Schedule Advantage

Blasting is significantly faster and more cost-effective than hydraulic hammering — reducing schedule impact and keeping bids competitive.

FEDERAL IDENTIFIERS

UEI	QQE1N3FDX4L3
CAGE Code	19RJ3
SAM.gov	Active registration (exp. 27 Mar 2027)
Business type	Veteran-Owned Small Business (self-certified) Self-Certified Small Disadvantaged Business
Entity	Limited Liability Company — Idaho, est. Nov 2020
NAICS	238910 Site Preparation Contractors (<i>primary</i>) 237990 Other Heavy & Civil Engineering Construction 562910 Remediation Services
PSC	F021 Natural Resources/Conservation — Site Preparation Z1QA Maintenance/Restoration of Real Property F113 Environmental Systems — Wetlands Conservation
Licensing	Federally explosives licensed (ATF). Licensed in ID, MT, WA, OR, NV, UT, NM.
Insurance	General liability \$1,000,000 per occurrence / \$2,000,000 aggregate
Bonding	Subcontract work; performance bond available through the prime's surety on request
Geography	Inland Northwest & Intermountain West
